CLIENT UPDATE

Testing Update effective Monday April 28, 2008:

RPR w/ Reflex to Titer and In-patient Prenatal Panel

Effective Monday April 28, 2008 all reactive RPR's will automatically reflex to a titer and confirmation by FTA. This applies to those ordered individually, as well as those order as part of a Prenatal Panel.

Additionally, as of that date, we are now offering an In Patient Prenatal Panel with the following components:

Type & Screen
CBC
RPR with reflex to titer
Rubella Antibody IGG
Hepatitis B Surface Antigen
Rapid HIV-1/2

The Out Patient Prenatal Panel is still offered for those patients that are not hospitalized.
