

Salem Health Laboratories

CLIENT UPDATE

LABORATORY SUPERVISOR ON CALL 17475

Salem Health Laboratories has a member of the leadership team or senior staff on call 7 days a week, 24 hours a day to provide emergency assistance to Nursing and Medical Staff. This individual can be reached by dialing 17475 from the hospital campus, or 503-561-7475 if the caller is off site.

This emergency single point-of-contact for all Laboratory functions should be utilized if there are patient care issues which have not been resolved through normal channels. The Supervisor on call can also assist in reaching a senior member of the Management staff, should their assistance be required in critical situations.

Please do not use this contact for routine issues, nor those that can be resolved through normal channels, as it will prevent proper prioritization of incoming calls. For routine issues, please contact Client Services at 15288 if on campus, and 503-561-5390 if off campus.

Please feel free to contact me if you have questions.

Earl Rogers
Laboratory Administrative Director
