CLIENT UPDATE

Sweat Analysis Testing for Cystic Fibrosis

Effective September 1, 2008

**Will Be Performed on an Outpatient Basis Only
Monday – Friday**

**Please Call 503.561.5288 For Scheduling
Allow 1-2 Hours for the Test Procedure**

Sweat Conductivity testing is used to screen for Cystic Fibrosis. It is best performed on a patient who is well hydrated. Patients having a borderline or positive result should be referred for a quantitative sweat chloride concentration (available at OHSU or OML).
