

CLIENT UPDATE

Cessation of Parallel Testing

Effective Monday October 1, 2007 parallel testing for CEA and PSA will no longer be available. Rebaselining of these tests was offered beginning July 10, 2007 due to testing equipment changes in the Chemistry department. This no charge service was provided to insure Physicians had ample data to continue monitoring those patients for whom serial testing was being followed.

Please contact one of the following individuals if you have questions.

Larry Konick, M.D.
Director, Clinical Chemistry
