

CLIENT UPDATE

Urine Drug Screen
Effective April 17, 2007

Salem Hospital Regional Laboratory is pleased to offer an enhanced urine drug screen which contains three additional analytes: Oxycodone, Propoxyphene, and Methadone. These additional analytes are being added to the ED Lab Emergency Drug Screen, Emergency Urine Drug Screen, and the Urine Drug Screen – 9 tests. These three 9 test screens will no longer be available, but all other currently offered urine drug screens are unchanged. With this enhanced product, the detection cut off limits for TCA and Barbiturates have also decreased.

Enhancements		
Drug Class	Cut-Off	Previous Cut-Off
Barbiturates	200 ng/mL	300 ng/mL
Tricyclic Antidepressants (TCA)	300 ng/mL	1000 ng/mL
Oxycodone (new)	100 ng/mL	N/A
Propoxyphene (new)	300 ng/mL	N/A
Methadone (new)	300 ng/mL	N/A

New Urine Drug Screens		
Name	Drug Class	Positives Auto-Reflexes for Confirmatory Testing
ED Lab Urine Emergency Drug Screen, 12	Amphetamines, Barbiturates, Benzodiazepines, Cocaine (Metabolites), Methadone, Opiates (Morphines), Oxycodone, Propoxyphene, THC (Marijuana) Tricyclic anti-depressants, Methamphetamines, Phencyclidine (PCP)	No
Emergency Urine Drug Screen, 12	Same as Above	No
Urine Drug Screen, 12 Tests	Same as Above	Yes

Urine drug screen testing available at Salem Hospital Regional Laboratory is intended for screening purposes only. False positive results may occur as a result of medication cross-reactivity, therefore, should be evaluated in conjunction with the patient’s condition, as well as prescription and OTC medication use.

For information on all currently offered urine drug screens, please see the attached chart.
