

Salem Hospital construction update

June 9, 2006

Additional shuttle service added

New: Beginning Saturday, June 10, shuttle service will be provided on weekends between 10 a.m. and 4 p.m. This is a test period for six months to determine the need. The six month time period was chosen to ensure that the test included rainy periods, when shuttle use is expected to grow.

Sidewalk closures

In progress: The sidewalk on the north side of Oak Street, between Capitol Street and University Street will be closed through the end of next week. The south-side sidewalk is open.

Parking changes

New: On Monday, June 12, the west side of the parking area south of the Family Birth Center on Oak Street SE will be converted to valet parking. The pedestrian path from the garage to Oak Street will remain as is.

New: On Saturday, June 17, an electrical re-feed of the parking garage is schedule from 8 to 11 a.m. This will impact the lighting and the elevators from service during this duration.

Shuttle shelters

In progress: A shelter is being built for the shuttle stop, in front of the Center for Outpatient Medicine.

Drilling activity

In progress: Crews will be drilling this weekend, in front of the Center for Outpatient Medicine, to prepare for the new sky bridges. It is scheduled for June 10, between 7 a.m. and 2 p.m. One drive lane will remain open for patient access to the COM.

Date change: The drilling in front of the hospital will occur on Saturday, June 17, not the 24th, as originally reported. Part of the entrance and some of the drop-off spots under the portico will be affected.

People wishing to enter the hospital are encouraged to use the door south of the water fountain, or the automatic door north of the main entrance. Both of these doors are very close to the main-entrance door.
