
Salem Hospital construction update
May 12, 2006

It's almost over

The utility and road work that needs to be done before the new patient tower can be built is almost over!

Another safety reminder

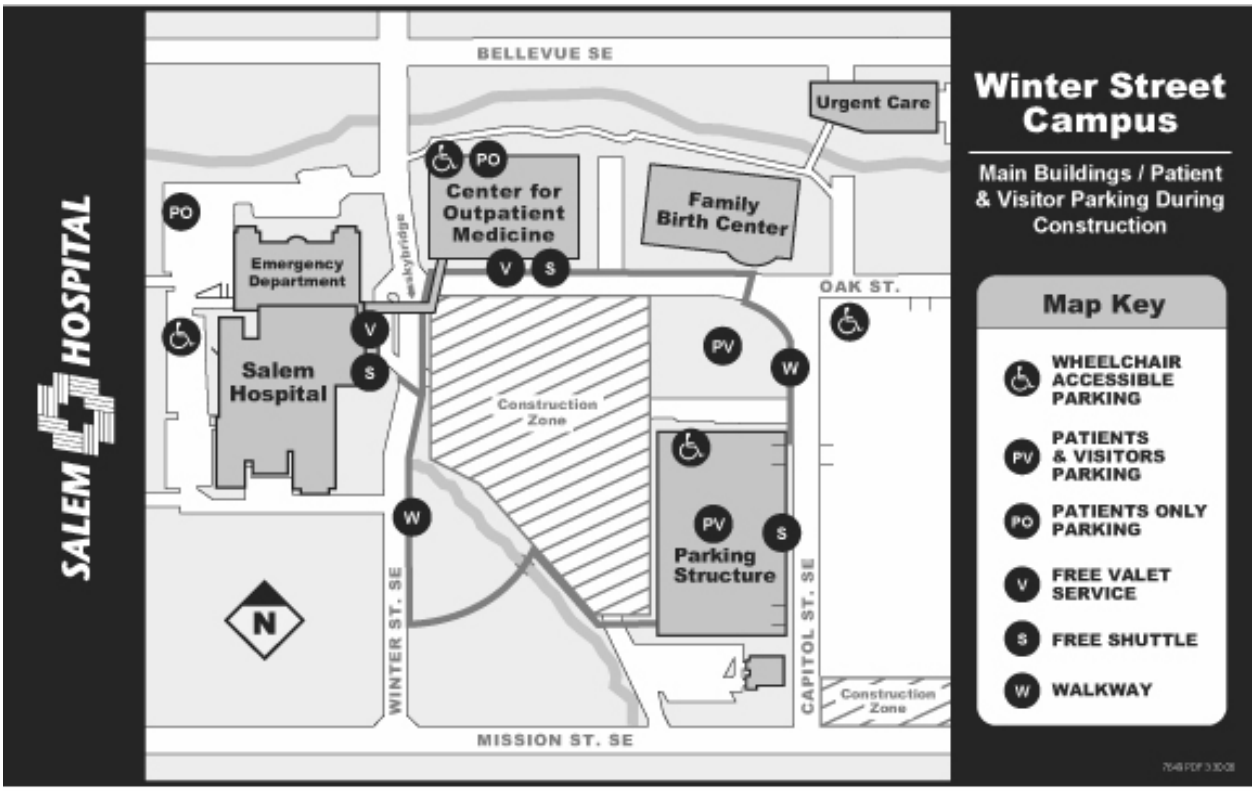
Please use the sidewalks and walkways. DO NOT walk in the streets or through the fenced construction area.

We have added dozens of new signs throughout campus to help direct drivers and pedestrians to their locations. We also added flaggers and security staff to help keep people moving and in the direction they need. Please observe all directional signs and instructions from the flagers and security staff.

Parking garage demolition

Preparation for demolition work is in progress. Demolition will take several months.

Oak Street SE

Oak Street SE at Capitol Street SE, will be closed for about two more weeks.


Pedestrians who need to cross that intersection should walk behind the Family Birth Center.
