

Salem Hospital construction update

July 20, 2007

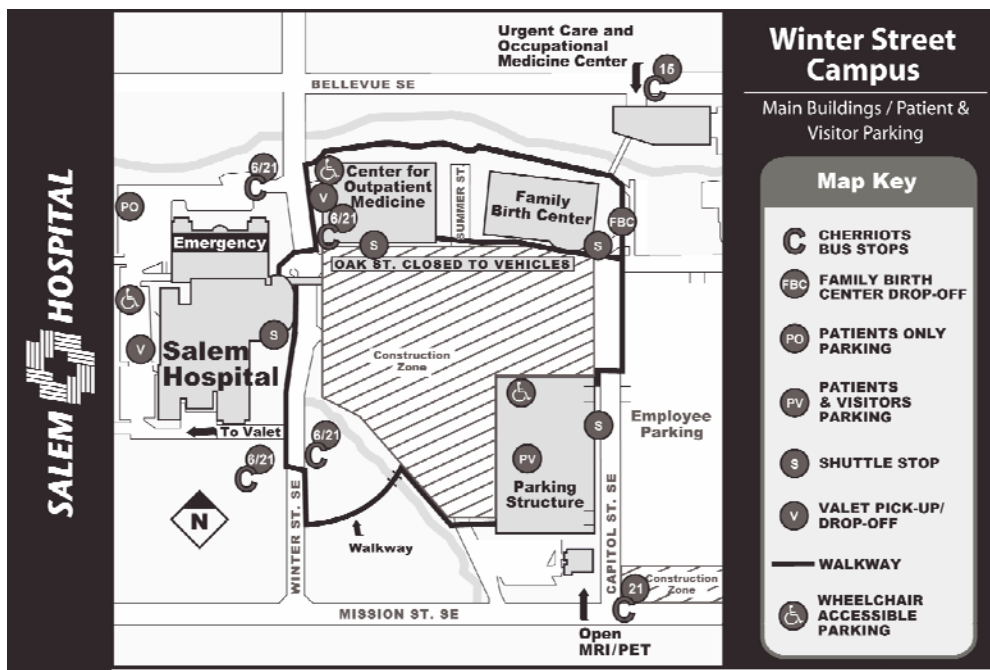

Changes at the Family Birth Center

On Tuesday, July 24, the turnaround for the birth center will move to its permanent location, on the east side of the birth center, as noted by the “FBC” symbol on the map below. This area is for patient drop off and pick up only, not for parking.

About a week later, the main entrance to the FBC will temporarily move from the front of the building to the east side of the FBC, near the new FBC turnaround. This is necessary so that work can be done to complete the permanent improvements in front of the FBC, on Oak Street SE.

A variety of pedestrian path changes will be occurring in the next several weeks as a result of this work. Signs will be in place to guide you to your desired location.

This work will continue through the end of August.

Winter Street skybridge

To finish the new Winter Street skybridge, Turner Construction company will be building scaffolding around the skybridge frame. This will allow crews to work on the skybridge without having to temporarily close any lanes of Winter Street.

Valet parking to change in August

Valet parking will return to its original location in the front of the hospital. Watch for details in a future update. Note: The valet services at the Center for Outpatient Medicine are not affected by this change and the free shuttle service continues unchanged.
