

Salem Hospital construction update December 21, 2007

What's happening in the patient-care tower

- Wall inspections are underway and drywall will be installed soon on the first two floors.
- The escalator is installed.
- Elevator shafts are being framed with installation beginning in January.
- Bricks are being placed West to East on the South side of the tower, with 125,000 bricks used to date.
- Six-thousand square feet of glass has been installed, with another 57,000 square feet to be installed.

Lights on the crane

How many lights are used for a 240 foot long, 260 foot reaching crane? Thirteen-thousand LED lights, with one light at every inch.

Safety reminder

Please be sure to follow the designated pedestrian paths while walking throughout the campus. Although the Urgent Care Center is open additional hours for the holidays, we'd prefer not to see you there because you were injured while in the path of a vehicle.

Happy Holidays
